PROFESSIONAL OVERVIEW

Full-Stack Web Developer experienced in developing scalable web applications, responsive user interfaces, and robust back-end systems. Skilled in modern web technologies, database management, and API development, with a focus on performance, usability, and maintainable code.

WORK EXPERIENCE

Junior Web Developer | Transcend Enterprise Solution, Philippines FEB 2026 – MAY 2026

- Accelerated software delivery schedules, measured by completing 2 full government web platforms within a 2-month deadline, by collaborating across cross-functional teams to build and maintain core service, company, job posting, and role-based access control modules.
- Streamlined complex legacy data management, measured by converting 1,000+ unstructured Excel files containing 15,000+ rows with zero data loss, by engineering an automated database migration script into a structured relational database
- Enhanced platform functionality and visual stakeholder alignment, measured by successful client approval and integrated tracking capabilities, by designing a WordPress mockup landing page for the NDC and implementing a dimension and indicator tracking system for Excel templates on the NYC-PYDI platform.

IT Specialist | ILAK Beauty Salon, Philippines MAR 2024 – FEB 2026

- Ensured seamless business operations and 100% record accuracy, measured by zero checkout delays and zero data discrepancies, by actively managing and maintaining appointment scheduling, point-of-sale (POS), and customer management systems.
- Enhanced system security, reliability, and performance, measured by zero critical data loss incidents and maximum system uptime, by executing routine software installations, custom configurations, system updates, and scheduled data backups.
- Minimized operational downtime, measured by rapid issue resolution times and uninterrupted salon workflows, by providing hands-on technical support and troubleshooting across hardware, software, network, and system infrastructure.

EDUCATION

Bachelor of Science in Information Technology | Our Lady of Fatima University, Philippines Graduated: 2026
Senior High School | First City Providential College, Philippines Graduated: 2022

SKILLS

PHP	CSS	MySQL
Laravel	Python	React
Kotlin	Flutter	Java
Vue.js	Alpine.js	Livewire
C	C#	C++
Git	WordPress	Objective-C

SEAN JOHN DUQUE

PROJECTS

CDC-JOBPORTAL | Transcend Enterprise Solution, Philippines MAR 2026

- Optimized database queries in MySQL, improving search response time or data retrieval speed.
- Developed for a centralized government portal, enabling seamless job applications and employer matching.

NYC-PYDI | Transcend Enterprise Solution, Philippines MAR 2026

- Built interactive tracking components using Livewire and Alpine.js to monitor web performance dimensions and indicator templates.
- Streamlined data flow across frontend and backend, ensuring accurate reporting across platform metrics.

CDC-HRIS | Transcend Enterprise Solution, Philippines MAR 2026

- Designed and implemented core modules for payroll, leave, and employee record management to streamline HR operations.
- Normalized relational database tables in MySQL, reducing data redundancy and optimizing query efficiency across employee records, payroll, and leave management.
- Seeded and structured core operational data, ensuring seamless record insertion and data integrity across all HR modules.
